Taxi Booking

PoolPal lets you book bikes, autos, and cars instantly for fast, safe, and affordable travel—anytime, anywhere.

Bike Pooling

PoolPal's bike booking connects riders with similar routes to share two-wheeler rides.

It makes commuting affordable and eco-friendly by splitting fuel costs among verified users.

Car Pooling

PoolPal makes car booking easy and hassle-free for your daily commute or long-distance travel. Choose from comfortable car options with verified drivers and upfront pricing. Track your ride in real time and pay digitally with ease. Enjoy a safe, smooth, and affordable car ride every time.

Auto Pooling

To offer users a convenient, cost-effective, and eco-friendly travel option by connecting passengers heading in the same direction, while promoting shared mobility in urban and rural areas.

Pool Pal

Goods Transportation

PoolPal offers reliable goods transport with two-wheelers, tempos, mini trucks, and trucks—ensuring safe, fast, and affordable delivery across locations.

Mini trucks

Mini trucks are perfect for transporting Bulky Items over short or medium distances. They're commonly used for shifting goods, stock, and produce efficiently.

Tempos

Best suited for medium-sized goods, tempos offer a balance between speed and capacity—great for vendors, shopkeepers, and local suppliers.

Two-Wheelers

Ideal for small parcels and urgent deliveries, PoolPal's two-wheeler service ensures quick and cost-effective transport within city limits and nearby areas.

Trucks

For heavy and high-volume transportation, PoolPal offers full-sized trucks that are reliable for long-distance deliveries, agricultural loads, or industrial shipments.

Pool Pal

Car Pooling

PoolPal offers convenient and affordable carpooling to connect people traveling in the same direction.

Car Pooling

To offer users a convenient, cost-effective, and eco-friendly travel option by connecting passengers heading in the same direction, while promoting shared mobility in urban and rural areas.

PoolPal's Car Pooling service helps individuals traveling in the same direction connect and share a ride. Designed to make daily commutes smarter, it reduces traffic, travel costs, and carbon footprints while fostering community mobility across regions.

How It Works:

- Enter pickup & drop locations
- Get matched with nearby riders going the same way
- Confirm & track your ride in real-time
- Pay securely via app

Why Choose PoolPal Car Pooling:

- Affordable shared travel
- Eco-friendly solution
- Verified co-riders & secure rides
- Flexible timings & trusted routes

Yatra

PoolPal's Yatra service offers safe travel to pilgrimage sites, with help to find nearby hotels, tourist spots, and local attractions for a complete journey

Explore Tourist Places

Beyond spiritual sites, PoolPal also guides you to nearby tourist places and cultural landmarks, allowing you to make the most of your journey.

Nearby Hotels & Stay Options

We help travelers discover clean and budget-friendly hotels near pilgrimage spots, making your trip more convenient and restful without the hassle of searching.

PoolPal's Yatra service is designed to offer safe, comfortable, and well-organized travel to popular pilgrimage sites, spiritual gatherings, and religious festivals across the region.

Trusted Vehicles & Drivers

Our vehicles are equipped for long-distance journeys and are operated by experienced drivers who understand regional routes, customs, and the spiritual importance of each destination.

Hotel Bookings

PoolPal makes hotel booking effortless with options from budget rooms to premium stays, real-time availability, and trusted reviews. Secure payments, instant confirmations, and exclusive deals ensure a smooth and stress-free travel experience.

Nearby Hotel Bookings

Find and book nearby hotels quickly with PoolPal's real-time availability and trusted reviews. Enjoy secure payments and instant confirmations for a seamless, hassle-free stay.

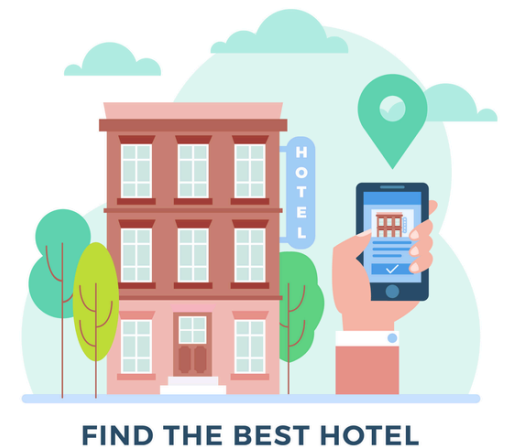

Find the Perfect Room for Every Stay

Experience hassle-free hotel reservations with options to suit every traveler. Choose from comfortable **Single Rooms, Double Rooms, Deluxe Rooms, Family Rooms, and Suites** for a luxurious stay. We also provide separate rooms for devotional visitors seeking peace during temple visits, as well as dedicated rooms for trip groups to relax after their journeys. With secure booking, affordable prices, and trusted hospitality, your stay is always smooth and memorable.

Secure & Hassle-Proof Payments

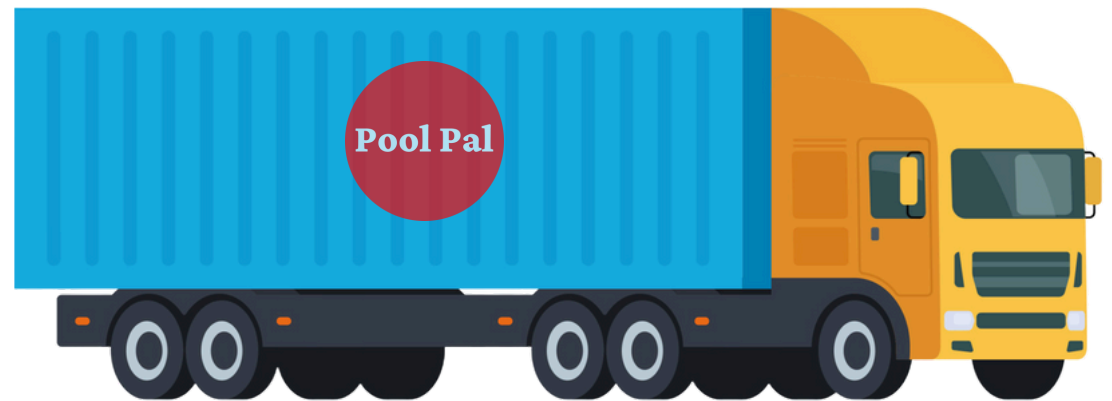

PoolPal ensures secure transactions with multiple payment options like cards, UPI, wallets, and net banking.

With instant confirmations, you can book confidently and focus on enjoying your trip stress-free.

POOLPAL is a public transport service operating from Galli to Delhi and from Delhi to remote villages. It helps you reach your destination within your budget, on time, and with complete safety. POOLPAL's intention is to provide an easy and affordable way for all Indians to reach their destinations.

POOLPAL GOODS SERVICES – it helps goods transportation from local produce to industrial products all over india, whether it is export or import goods POOLPAL makes sure that they will reach the right place in right time with safety to their destination.

POOLPAL builds strong connection between Farmers, Industries, Business, Customers etc..

GOODS AND TRANSPORT WITH POOLPAL WILL BE THE PLATFORM FOR ALL OVER INDIA

ABOUT US

PoolPal is a rural-first transport platform offering ride-sharing and goods delivery across villages, towns, and cities. Designed for low-connectivity areas, our app supports , regional languages, and real-time vehicle matching. From daily commutes to transporting farm produce, Pool Pal makes mobility simple, affordable, and accessible—while creating local job opportunities and supporting rural growth.

KEY ACTIVITIES

PoolPal is an all-in-one ride-sharing app that offers bikes, cars, and autos—especially focused on rural and intercity travel. It helps people easily share rides and save money, while also supporting goods delivery for farmers and small businesses. Whether it's passengers or cargo, PoolPal connects the right vehicle fast. With special focus on smaller towns and villages, PoolPal brings better transport, more reach, and stronger local connection

VISION

To revolutionize rural and semi-urban transportation across India by making ride-sharing and goods movement accessible, affordable, and sustainable for every household and farmer.

MISSION

To build an inclusive transport platform that connects people and goods from remote villages to cities through technology-enabled carpooling and delivery services, reducing wait times, enhancing convenience, and empowering rural mobility.

MARKET ASSESSMENTS

Industry Size & Growth Potential

- India's public transportation market stood at ₹ 1.85 trillion in 2023.
- CAGR of 9.8% expected till 2030 in mobile-based services.
- Huge demand for rural connectivity and logistics solutions.

TARGET AUDIENCE

Rural commuters in villages and tier-3 towns.

- Small and marginal farmers needing transport to cities.
- Intercity travelers seeking affordable shared rides.
- Small traders and sellers with goods transport needs

COMPETITIVE LANDSCAPE

Key players: Ola, Uber, BlaBlaCar, Rapido, Namma Yatri.

Differentiators:

- 1. Rural Reach:** Unlike urban-centric players, we target underserved tier-3 towns and villages.
- 2. Dual Service Model :** We combine carpooling with goods transport in a single platform.
- 3. Farmer Empowerment :** We enable direct farm-to-market logistics, reducing produce loss.
- 4. Eco-Friendly Approach :** We promote fuel-efficient carpooling to reduce environmental impact.
- 5. Local Driver Integration :** We onboard rural drivers and vehicle owners for hyperlocal service

MARKET PROBLEMS

- 1. Poor Rural Connectivity** Over 40% of Indian villages lack consistent and reliable transportation options, limiting access to jobs, healthcare, and education (Source: NITI Aayog).
- 2. High Transportation Costs** Rural populations spend up to 20% of their daily income on travel due to limited shared ride options and reliance on expensive private vehicles (Source: World Bank).
- 3. Long Wait Times for Transport** Public transport in rural areas is infrequent and overcrowded, resulting in wait times of 30– 60 minutes or more for commuters.
- 4. Post-Harvest Produce Loss** Farmers lose up to 30% of their crops post-harvest because of inadequate logistics and lack of access to timely goods transport (Source: ICAR).

MARKET PROBLEMS (CONTD..)

5. Exclusion from Digital Mobility Platforms Existing mobility apps (like Ola/Uber) do not operate in most tier-3 or rural areas, leaving these communities digitally disconnected from modern transport solutions

6. Even when major roads or highways are present nearby, rural residents often lack first- and last-mile options (like shared autos or small buses) to reach main transport hubs.

- Impact: Increases reliance on walking or informal, unsafe transport methods.
- Root Cause: Poor integration between villages and formal transport networks.

7. Buses and vehicles in rural areas are often underutilized during off-peak hours or operate without fixed schedules, leading to inefficiencies and operational losses.

- Impact: Higher per-passenger costs and reduced service reliability.
- Solution Opportunity: Data-driven route planning and shared mobility models.

SOLUTIONS

1. Rural-First Mobility Network

We provide affordable and accessible transportation in tier-3 towns and rural areas through a tech-enabled platform designed for low-connectivity zones

2. Cost-Effective Shared Rides

We offer ride-sharing options at significantly lower rates than private travel, helping rural users save on daily transportation expenses

3. On-Demand App-Based Booking

Our mobile app allows real-time vehicle booking with reduced wait times, improving travel convenience for both passengers and farmers.

4. Integrated Goods Transport for Farmers

We empower farmers to transport produce directly from village to city markets, reducing post-harvest loss and improving their earnings.

SOLUTIONS (CONTD..)

5. Dual-Use Platform for Riders and Traders

We combine passenger and goods movement in a single app, simplifying logistics and maximizing vehicle utility in rural ecosystems.

6. Offline Support & Regional Languages

Our platform supports offline booking features and offers the app in multiple regional languages, ensuring inclusivity for users in low-connectivity and low-literacy areas.

7. Rural Livelihood & Entrepreneurship

We create livelihood opportunities by enabling local vehicle owners to earn through passenger and goods transport, fostering rural entrepreneurship.

8. Smart Routing for Efficiency

Using demand data and local insights, we dynamically adjust routes and pickup points for maximum efficiency and reduced fuel use.

FUTURE OF INDUSTRY

1. Rise of Rural Tech Adoption With smartphone penetration increasing in villages, app-based solutions for transport and logistics are becoming more viable and scalable.
2. Government Push for Rural Mobility Policies like PM Gati Shakti and rural transport subsidies are creating an ecosystem supportive of last-mile connectivity startups.
3. Growth of Agri-Logistics Market India's agri-logistics market is projected to grow rapidly, opening up space for tech-enabled solutions tailored to farmer needs.
4. Sustainability in Transport Eco-friendly, shared mobility models are gaining preference due to rising fuel costs and environmental awareness in both policy and consumer behavior.

FUTURE OF INDUSTRY (CONTD...)

5. Demand for Integrated Transport Platforms The future favors platforms that offer multi-functional services— ridesharing, cargo delivery, and local partnerships— especially underpenetrated areas.
6. With the adoption of UPI, Aadhaar-enabled payments, and mobile wallets in rural India, it's easier than ever to enable cashless transactions for rides and deliveries.
7. As rural youth migrate to cities, there's a growing need for reverse logistics and travel options for goods and family visits—creating more two-way transport demand.

FOUNDER INFO

RAGHUPATHI YADAV SINGEETHAM

FOUNDER, CEO & BUSINESS DEVELOPMENT
MANAGER

How POOLPAL Was Born

I founded POOLPAL with a simple yet meaningful vision — to solve the everyday transportation problems faced by people in rural and semi-urban India. Growing up in a small town, I witnessed how limited access to affordable and reliable transport often stood in the way of people reaching schools, hospitals, markets, and even job opportunities. It wasn't just inconvenient — it was unfair. That's when I decided to build something that could change that.

What PoolPal Means

The name PoolPal reflects our core vision—bringing people together through shared rides, deliveries, and services. Pool stands for sharing resources, while Pal represents a trusted partner or friend. Together, PoolPal symbolizes a smart, supportive platform that simplifies daily transport and logistics with a sense of community and collaboration.

Empowering Communities

One of the most fulfilling aspects of this journey has been watching how POOLPAL empowers local drivers and vehicle owners. They're now able to earn a steady income by transporting both passengers and goods. We're not just solving a transport problem — we're creating livelihood opportunities and supporting rural entrepreneurship.

Built for Real People

POOLPAL is more than just an app — it's a people-first mobility platform. We designed it to work in areas with low internet connectivity, made sure it supports multiple regional languages, and created a simple interface that anyone can use. Whether it's a farmer transporting fresh produce or a student commuting to college, POOLPAL helps people travel safely, affordably, and on time.

A Vision for the Future

As the founder, I believe that mobility is not just about getting from one place to another — it's about access, dignity, and growth. POOLPAL is committed to being a bridge between rural communities and the opportunities they deserve. We're just getting started, and the road ahead is full of possibilities.
